ULTRA TOUR SERIES

Mountaineering & Touring Performance

The ULTRA TOUR Series is built for ski mountaineers who need ultralight efficiency on the ascent and powerful precision on the descent. GRAND DADDY, STS, and SWISS combine weight-optimized construction with advanced stabilization technologies to support long touring missions, steep lines, and technical alpine terrain.

Each ski features a **Full Carbon Jacket** over a **Paulownia wood core** to deliver exceptional rigidity, stability, and vibration reduction without adding added weight. The PRO-Flex ensures consistent flex for easier ascents and precise, confident descents.

Technologies include carbon torsion reducers (50% less torsional twist), ABS double-layered tips for reduced chatter, TPU heel shock absorbers, and 0.5mm titanal binding reinforcements for secure, durable mounts. NEOTERIC camber and high, extended noses promote a centered stance for energy-efficient touring and controlled downhill performance.

From ultralight long tours to technical couloirs, the ULTRA TOUR Series keeps skiers agile, confident, and powerful.

NEOTERIC CAMBER PRO-FLEX

ULTRA TOURER FULL CARBON JACKET

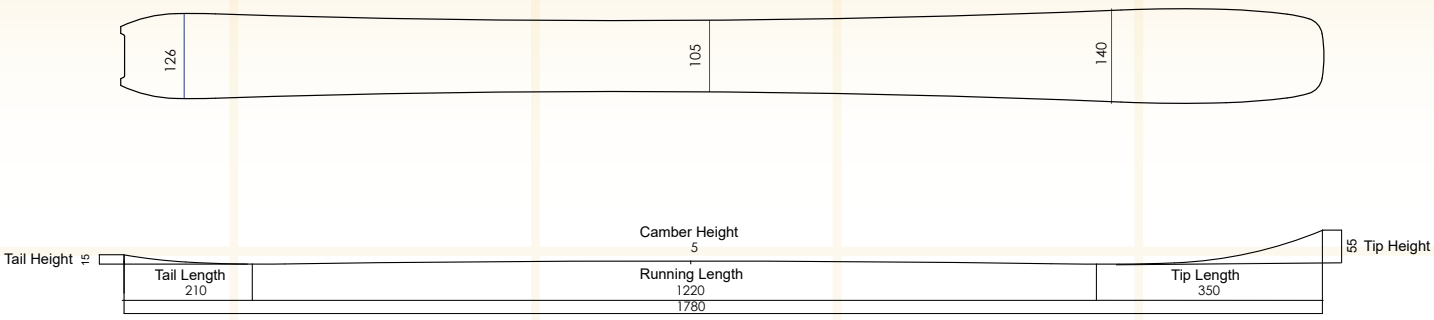

The GRAND DADDY is a big-mountain free-touring ski, made for fast uphill climbs and powerful descents. With NEOTERIC camber and an extended tip, it delivers centered balance, reduced fatigue, and precise edge grip when the terrain turns demanding. A Paulownia core keeps it light, while composite reinforcements, stabilizers, and shock absorbers hold it steady through icy traverses, deep powder, and exposed lines. Now refreshed in brown with pixel-camo yellow and green design to ski GRAND.

Free Ride Series

All-Mountain Freeride Performance

The FREE RIDE Series is built for skiers who need powerful, stable, and responsive performance across big-mountain, all-mountain, and variable freeride terrain. GRIZZLY and BIG combine a centered stance, elongated nose, and straight-line profile for reduced fatigue and enhanced edge control in steep, technical, and variable terrain.

Construction features a Mixed Wood Core (Paulownia + Poplar) encased in a Full Fiberglass Jacket, delivering balanced flex, durability, and responsive handling. Fiberglass smooths the ride across all snow conditions, while the poplar core adds strength and stability without extra weight.

Shared technologies include Power Plate, ABS Tip Layers, and Carbon UD Vibration Reducers for smooth handling, high responsiveness, and reduced chatter. Torsion Stabilizers enhance edge grip and efficient power transfer, while titanal binding reinforcements and TPU heel shock absorbers increase impact absorption and confidence on big-mountain landings.

The FREE RIDE Series keeps professional skiers agile, powerful, and fully in control across the mountain.

CONTEMPORARY SERIES

Front Resort Performance

The CONTEMPORARY Series is built for skiers who want stability, precision, and smooth performance across resort piste, mixed snow, and side-country terrain. LE TOUNO and CROIX DE FER combine high-performance construction with smooth, reliable flex for confident, controlled skiing.

Each ski features a Full Fiberglass Jacket over a Mixed Paulownia + Poplar core, delivering lightweight strength and responsive flex. The PERFORMANCE-Flex profile ensures consistent handling and precise turn initiation on all resort conditions.

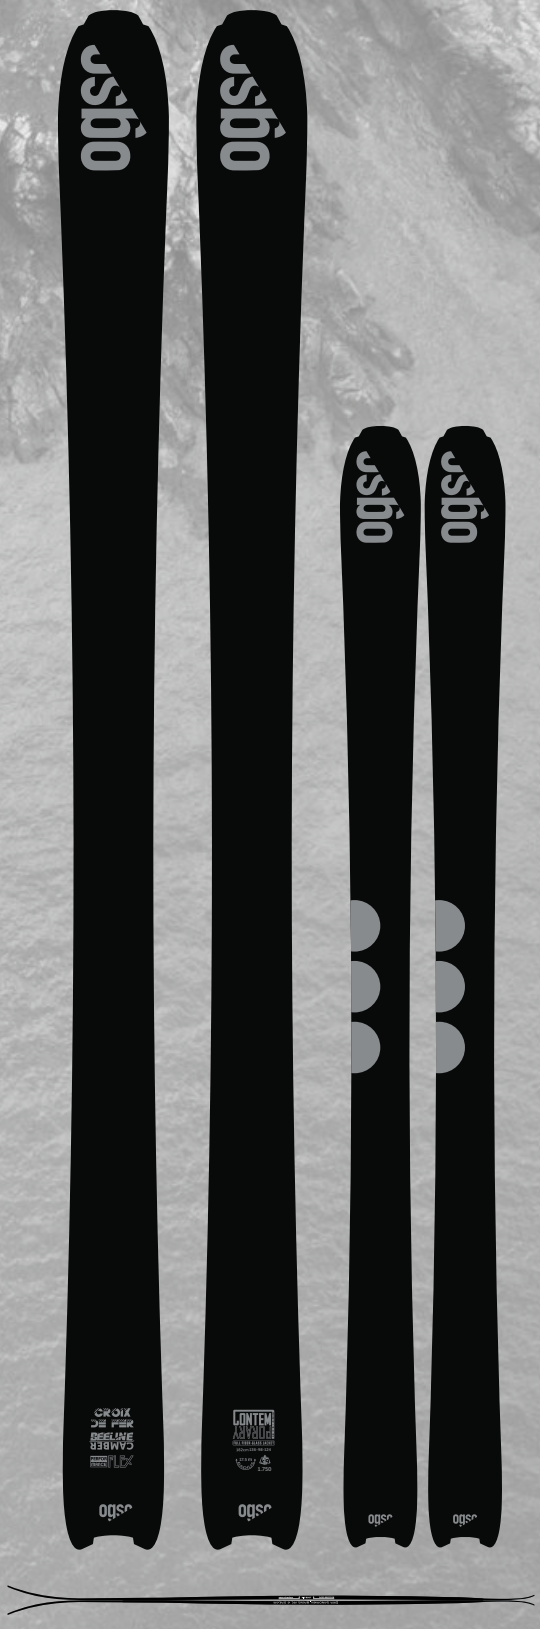

Upper and Lower Power Plates beneath the boot add power and stability under load, prevent unwanted flex on steep terrain or hard landings, and maintain consistent energy transfer. Laminate screw reinforcement ensures secure, lightweight binding retention for long-term reliability. ABS double-layered tips reduce vibration and chatter on firm snow, while TPU heel shock absorbers soften impacts and maintain composure through variable conditions.

The CONTEMPORARY Series brings together versatile profile and solid construction to create skis that remain balanced, reliable, and precise across the full range of resort environments.

BEELINE CAMBER

PERFORMANCE FLEX

CONTEMPORARY MIXED WOOD-CORE FULL FIBER-GLASS JACKET

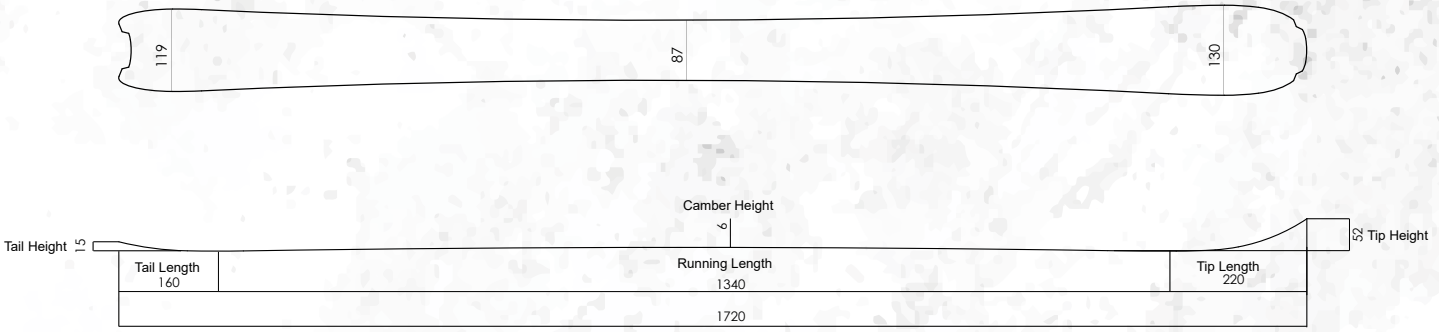

LE TOUNO is a resort-ready carving ski, with BEELINE camber that unlocks sharp precision while keeping transitions smooth and forgiving. Its mixed Paulownia with Poplar core, paired with Upper and Lower Power Plates and laminate binding reinforcement, stiffens and stabilizes the ski under the boot for secure power transfer and confidence at speed. Now in all grey, because sometimes less paint means more attitude.

SCURRY ODYSSEY SERIES

Play & Ride Performance

The SCURRY ODYSSEY Series is built for skiers who want fun, dynamic, and expressive performance across groomers, powder, and wide, variable terrain. KOIRYU and RYUMON combine high-performance construction with playful, surf- and new-school–inspired design.

Each ski features a Full Fiberglass Jacket over a Poplar wood core for a durable, stable, and responsive ride. The FIRM-Flex profile delivers energetic, precise turns while maintaining a lively, playful feel, ideal for carving, powder surfing, and creative terrain lines.

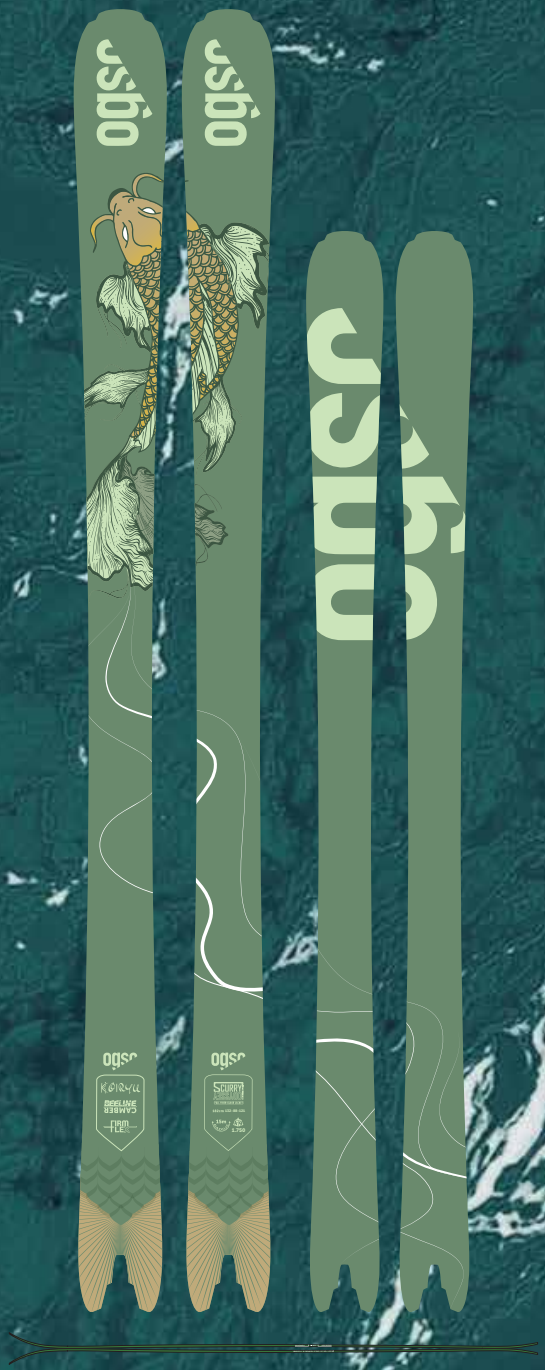

Upper and Lower Power Plates under the boot add strength, stability, and consistent energy transfer, preventing unwanted flex during high-pressure skiing or landings. Laminate screw reinforcement ensures secure, lightweight binding retention.

ABS double-layered tips reduce chatter, TPU heel shock absorbers smooth impacts, and BEELINE camber provides crisp edge grip, responsive carving, and fluid transitions.
The series geometry and deep fishtail design enhance float, surf-like movement, and playful carving, creating skis that keep riders confident, expressive, and fully engaged in every turn.

RYUMON

KOIRYU

KOIRYU 86 / 88

BEELINE CAMBER

PERFORMANCE FLEX

CONTEMPORARY MIXED WOOD-CORE FULL FIBER-GLASS JACKET

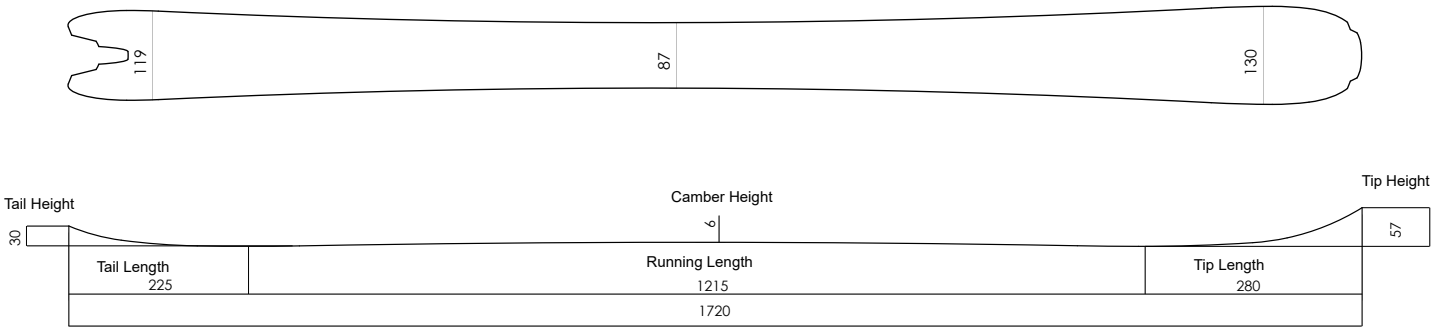

KOIRYU is your new-school fishtail ski for snow riders. BEELINE camber delivers crisp, playful turns with smooth transitions, while its long, deep fishtail glides through powder and carves groomers with confidence. A strong Poplar core, combined with Upper & Lower Power Plates and laminate binding reinforcement, stiffens and stabilizes the ski directly under the boot, ensuring precise power transfer and controlled flex. Inspired by the mythical KOI FISH transforming into a dragon, finished in sage green for a ski that turns heads.

DROW

MINIMALIST, RELIABLE, READY FOR ANYTHING

The **DROW** is a one-piece touring pole designed for skiers who want straightforward performance. Durable, dependable, and versatile, it's made for daily use across changing terrain, perfect for any skier who demands consistent response from their gear.

The shaft is crafted from aerospace-grade 7075 aluminum, balancing low weight with long-lasting strength. Up top, a classic shepherd's crook knob gives skiers confident handling whether skinning, transitioning, or maneuvering tight lines.

A key feature is the extended EVA foam grip, which tapers down the shaft to offer insulation and better control on sidehills or during kick turns. Grip length is tailored to each size for better hand placement and ergonomic efficiency, a detail tourers and pros will feel right away.

At the base, the Dual-Material Hybrid Basket is built for all-mountain versatility. Its flexible TPEE inner ring sheds snow to stay light, while the rigid PA edge scrapes skis clean featuring a finger tip that is designed to adjust bindings on the fly, no fumbling or freezing fingers.

WHIZ

TAKE THE MOUNTAIN SERIOUSLY

The **WHIZ** is a one-piece ski pole designed for skiers who need maximum reliability in serious terrain. It's built for security, precision, and advanced functionality, ideal for steep ascents, exposed traverses, and technical descents.

The extra-long conic EVA foam grip tapers along the upper part to provide control, insulation, and adaptability in uneven conditions. Each size features a grip length adjusted for that specific shaft, offering confident handling across climbs, bootpacks, and challenging lines. The top of the pole is shaped with a shepherd-style knob and includes a modular cap interface: it comes equipped with a Dyneema sling for safety rigging or climbing stability and can be swapped for a 360° camera mount for hands-free content capture.

The shaft is constructed from aerospace-grade 7075 aluminum for a dependable strength-to-weight ratio that holds up in high-consequence terrain. Just below the grip, a dedicated slot is integrated into the shaft to allow the addition of OGSO's GRAPNEL (sold separately), ready when the terrain demands extra security.

At the base, the Dual-Material Hybrid Basket ensures nimble performance in all snow types, combining a soft inner TPEE ring adapts to crust and powder, a the rigid PA outer ring scrapes snow and includes a shaped edge for adjusting bindings with gloves on.

YOYO

ADAPTABLE, INNOVATIVE, READY FOR ANY CHALLENGE

The **YOYO** is a two-piece ski pole designed for skiers and mountaineers who need versatility across variable terrain. It's lightweight, compact, and packed with technical features, ideal for long tours, steep climbs, and unpredictable conditions.

The shaft is built from aerospace-grade 7075 aluminum, offering a high strength-to-weight ratio that performs under pressure. The LeverLock mechanism allows fast, glove-friendly length adjustments for responsive handling during transitions, bootpacks, or changing slope angles. For transport, the YOYO includes a rubber tip plug to protect gear and ensure clean carry when stowed.

Up top, the extra-long conic EVA foam grip tapers down the shaft for balanced control and insulation. Each size is paired with a grip scaled to its length for optimal comfort. The classic shepherd-style knob includes a modular cap interface: it comes equipped with an integrated Dyneema sling for emergency support or exposed traverses and can be swapped for a 360° camera mount for hands-free filming. A dedicated slot beneath the grip accommodates OGSO's GRAPNEL, offering added confidence on technical terrain.

At the base, the Dual-Material Hybrid Basket delivers triple-function performance: a soft TPEE ring prevents snow buildup and improves grip on hardpack; a rigid PA outer ring is shaped with a finger tip to adjust bindings without removing gloves, and a rounded edge to scrape snow and ice from skis.
