ZERO SOPHISTO SERIES

Ultralight Freeride Touring Performance

The ZERO SOPHISTO Series marks the return of two OGSO touring icons; SCHWARZTOR and CORBETS, re-engineered for modern ski touring with updated construction and a distinctive new identity. This is not a relaunch, but a deliberate reset: a refined approach to what a touring ski can be.

Designed for advanced ski tourers, the series focuses on combining efficient ascents with stable, controlled performance on the descent, with no unnecessary weight and no compromise on performance.

A shared construction built around a Full Carbon Jacket and Paulownia core delivers low weight, high energy return, and consistent control. The SUPER ROCKER profile, with its long, high tip and tail, ensures natural float, smooth turn initiation, and a balanced stance in deep snow and variable conditions.

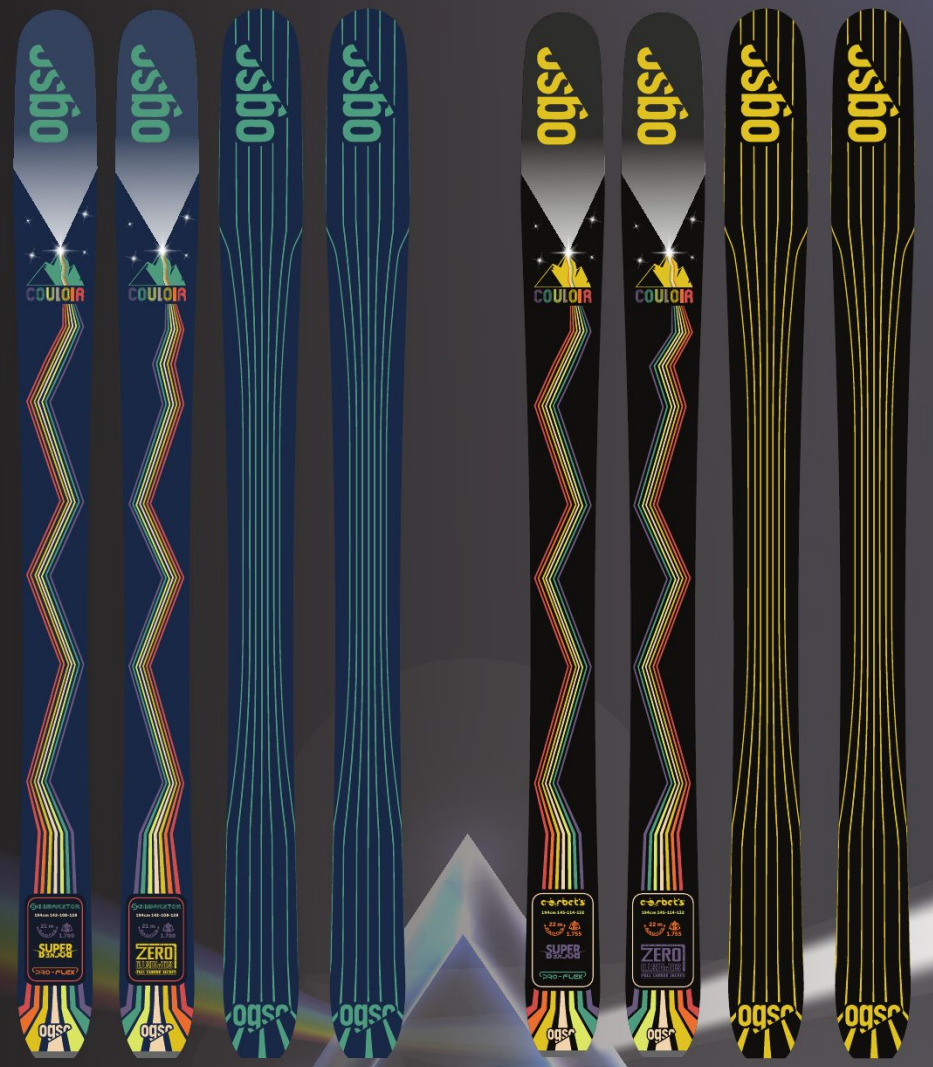

Supporting this, the Torsion Stabilizer enhances edge precision and reactivity, while the Vibration Reducer maintains a smooth, stable ride when conditions become demanding.

Within the series, SCHWARZTOR is oriented toward all-mountain touring, prioritizing precision and control in technical terrain, while CORBETS is designed for touring and powder, delivering float and fluidity in soft snow and open lines.

Built for skiers who know exactly what they expect from their equipment, and expect it to deliver.

SUPER ROCKER

PRO-FLEX

ZERO SOPHISTO FULL CARBON JACKET

SCHWARZTOR is your ultralight all-mountain touring ski, built for skiers who demand full-day alpine performance without carrying unnecessary weight. Its SUPER ROCKER profile keeps the nose and tail high for natural float, smooth turn initiation, and balanced control in deep or variable snow. A Full Carbon Jacket over a Paulownia core keeps the ski light, reactive, and efficient, while the Torsion Stabilizer and Vibration Reducer maintain precision and composure when terrain becomes demanding. The light at the end of the couloir is yours.

SUPER ROCKER

PRO-FLEX

ZERO SOPHISTO FULL CARBON JACKET

CORBETS is your ultralight touring and powder ski, designed for skiers who climb to chase soft snow and surf-inspired descents. Its SUPER ROCKER design, with a long, high nose and tail, delivers effortless float and smooth, centered control in powder and open terrain. Built with a Full Carbon Jacket and Paulownia core, CORBETS stays lightweight on the ascent while the Torsion Stabilizer and Vibration Reducer keep the ride stable and controlled in deep or variable snow. Every couloir starts as someone's secret. This ski is how you keep it that way.

Free Ride Series

All-Mountain Freeride Performance

The FREE RIDE Series is built for all-mountain freeriders and ski mountaineers who demand precision, stability, and energy efficiency from the first climb to the final descent.
Both skis in this line - GRIZZLY and BIG - feature a centered stance, elongated nose, and straight-line profile that minimize fatigue and enhance edge control in steep, technical, and variable terrain.

Construction combines a Mixed Wood Core (Paulownia + Poplar) with a Full Fiberglass Jacket, giving the skis balanced flex, durability, and responsiveness. The fiberglass enhances smoothness and control across all snow conditions, while the poplar core provides strength, stability, and longevity without unnecessary weight.

Shared technologies like Power Plate, ABS Tip Layers, and Carbon UD Vibration Reducer deliver smooth handling, high responsiveness, and reduced chatter. The Torsion Stabilizer ensures precise edge grip and efficient power transfer, while Titanal binding reinforcements and a TPU heel shock absorber enhance impact absorption and confidence during big-mountain landings.

The GRIZZLY stands out as an all-mountain freeride ski: stable, precise, and efficient on any snow, from powder to hardpack. The BIG takes it a step further, a big-mountain, progressive freeride ski that delivers more float, freedom, and power for riders chasing deeper snow and bolder descents.

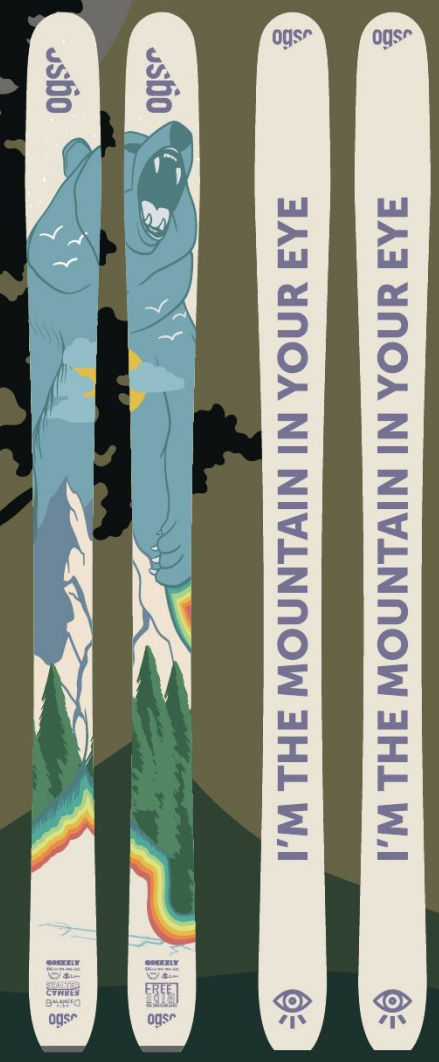

The visual identity evolves this season with illustrative topsheets reflecting each ski's character: the GRIZZLY depicts a powerful alpine grizzly in a light, off-white setting, while the BIG features a bold Bigfoot silhouette amid a dark alpine landscape, bringing personality and narrative to the mountain.

Wherever you roam, the FREE RIDE Series keeps expert skiers agile, powerful, and fully in control, all over the mountain.

EXALTED CAMBER BALANCED FLEX

FREE RIDE — TORSION STABILIZER · VIBRATION REDUCER · MIXED WOOD CORE · FULL FIBER-GLASS JACKET

GRIZZLY is your all-mountain freeride ski, with EXALTED camber for a sharp, stable, and energy-efficient ride. Float through powder, carve hard-pack, or navigate trees with confidence. High nose, mixed wood core, and stabilizers keep the ride smooth, while Titanal reinforcement handles impacts with ease. Its refreshed topsheet features a stylized grizzly emerging from alpine peaks and forests; powerful and exactly where it belongs.

ULTRA TOUR SERIES

Mountaineering & Touring Performance

The ULTRA TOUR Series is built for ski mountaineers who demand lightweight efficiency on the ascent and precise, reliable control on the descent. The line includes GRAN DADDY, STS, and SWISS, each engineered to cover a range of touring needs, from long-distance efficiency to steep, technical terrain and big-mountain lines.

All skis in the series feature a Full Carbon Jacket combined with a Paulownia wood core, delivering a high level of rigidity, stability, and vibration control while maintaining minimal weight. The integration of PRO-Flex ensures consistent flex and responsive handling, supporting both efficient climbs and controlled descents.

Core technologies across the series include carbon torsion reducer for enhanced edge precision, Titanal 0.5 mm binding reinforcements for secure and durable mounting, ABS double-layered tips to reduce chatter, and TPU heel shock absorber for improved impact damping. NEOTERIC camber, combined with extended high noses, promotes a centered stance, improving energy efficiency uphill and control in variable alpine conditions.

The series is designed to perform across a wide range of touring scenarios, from long, efficient ascents to steep couloirs and exposed descents, offering a balanced combination of lightness, precision, and stability.

The visual identity evolves this season through a collaboration inspired by Lionel Wibault's "Variations", reinterpreting the Mont-Blanc massif through bold lines, layered tones, and horizontal depth, translating the structure and rhythm of alpine terrain into a refined, modern design language.

NEOTERIC CAMBER PRO-FLEX

ULTRA TOUR FULL CARBON JACKET

SWISS is your ultralight long-tour ski, with NEOTERIC camber and a long, high nose that keeps your stance centered, energy efficient, and responsive across variable alpine terrain. Its Paulownia core with Full Carbon Jacket ensures ultralight efficiency uphill while stabilizers and shock absorbers keep you composed downhill. Its topsheet draws from Lionel Wibault's "Variations", translating the Mont-Blanc massif into layered tones and clean horizontal lines; a visual rhythm that mirrors the progression of a full day in the mountains.

NEOTERIC CAMBER PRO-FLEX

ULTRA TOUR FULL CARBON JACKET

STS is your all-mountain & steep-precision touring ski, with NEOTERIC camber and a high, extended nose that promotes a centered stance, energy efficiency, and precise edge grip in steep or mixed conditions. Its carbon construction keeps it ultralight yet strong, agile in couloirs and stable on open slopes. Power Plate, Torsion, and Tip Stabilizers deliver precise edge control and smooth, confident rides. Its topsheet reinterprets Lionel Wibault's "Variations", using bold lines and layered depth to reflect the structure and intensity of alpine terrain.

NEOTERIC CAMBER PRO-FLEX

ULTRA TOUR FULL CARBON JACKET

GRAN DADDY is your big-mountain free-touring ski, built for fast uphill climbs and powerful descents. With NEOTERIC camber and an extended nose, it delivers centered balance, reduced fatigue, and precise edge grip when the terrain turns demanding. A Paulownia core keeps it light, while composite reinforcements, stabilizers, and shock absorbers hold it steady through icy traverses, deep powder, and exposed lines. Its topsheet expands Lionel Wibault's "Variations" into broader, warmer tones; a powerful interpretation of the Mont-Blanc massif that reflects the scale and ambition of big-mountain touring.

SCURRY ODYSSEY SERIES

Play & Ride Performance

The SCURRY ODYSSEY Series is built for skiers seeking dynamic, versatile performance across groomers, powder, and variable terrain. The line includes KOIRYU, RYUMON, and RYUJIN, offering a progressive range from agile play to increased float and stability for more demanding conditions.

All skis in the series feature a Full Fiberglass Jacket over a Poplar wood core, delivering a durable, stable, and responsive ride. The FIRM-Flex construction ensures precise, energetic turns while maintaining controlled, consistent performance across different snow conditions.

Under the boot, Upper and Lower Power Plates provide added strength and improve energy transfer, reducing unwanted flex during high-speed skiing, landings, and high-pressure situations. Laminate screw reinforcement beneath the bindings ensures a lightweight yet secure hold.

Additional technologies include ABS double-layered tips to reduce chatter, TPU heel shock absorbers for impact damping, and BEELINE camber for reliable edge grip, responsive carving, and smooth transitions.

The fishtail design, combined with the series' shape, enhances float in soft snow while maintaining control and stability across varied terrain. From agile, playful riding to more powerful and committed lines, the SCURRY ODYSSEY Series provides a complete range of performance within a consistent design and construction platform.

The visual identity evolves this season, drawing from the koi-to-dragon transformation myth, with each model representing a stage of progression through a renewed design language.

KOIRYU is your new-school fishtail ski for snow riders. BEE-LINE camber delivers crisp, playful turns with smooth transitions, while its long, deep fishtail glides through powder and carves groomers with confidence. Lightweight Poplar core with Upper & Lower Power Plates and laminate screw reinforcement keeps it stable yet fun under pressure. Inspired by the KOI fish that dares the impossible and becomes the dragon, a story that continues this season in a renewed design.

BEELINE CAMBER
FIRM FLEX

SCURRY ODYSSEY
POPLAR WOOD CORE
FULL FIBER-GLASS JACKET

RYUMON is your new-school fish-tail ski for snow surfers. With BEE-LINE camber, it delivers playful turns, smooth transitions, and confident control across variable terrain. Its deep fishtail glides through powder, carves groomers with ease, and stays stable in surf-like movements. Built with a Poplar core, reinforced plates, and laminate screw reinforcement, it balances responsive stability with playful performance. Inspired by the Dragon Gate myth, where beyond the gate, the dragon doesn't stop, it flies; a story continued this season through a renewed design.

CONTEMPORARY SERIES

Front Resort Performance

he CONTEMPORARY Series is built for skiers who demand precision, stability, and versatile performance across resort, side-country, and all-terrain conditions. The line includes LE TOUNO, CROIX DE FER, and BARBEY, offering a progressive range from frontside carving precision to increased float and stability in more variable terrain.

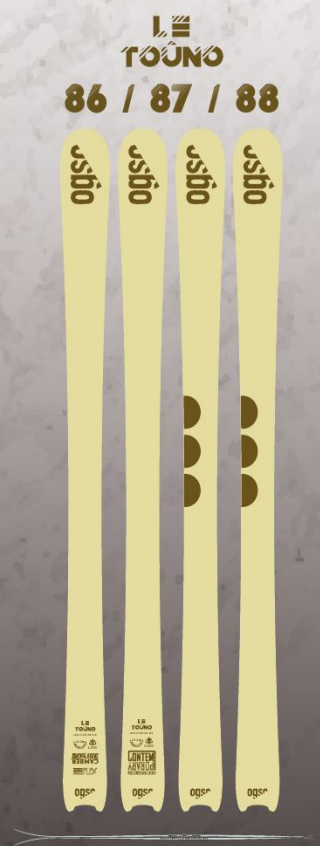

All skis in the series feature a Full Fiberglass Jacket over a Mixed Paulownia + Poplar core, delivering a balanced combination of flex, durability, and responsiveness without compromising weight. The PERFORMANCE-Flex construction ensures consistent flex and precise handling for controlled turns and confident skiing.

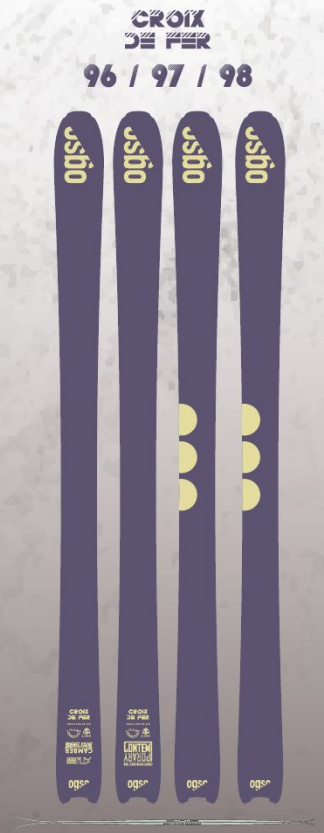

Under the boot, Upper and Lower Power Plates provide added strength and improve energy transfer, reducing unwanted flex during high-speed skiing, steep terrain, and landings. Laminate screw reinforcement beneath the bindings ensures a lightweight yet secure hold.
Additional technologies include ABS double-layered tips to reduce chatter and TPU heel shock absorbers for impact damping and stability.

The series is designed to maintain precision on groomers while extending performance into mixed and softer snow conditions, offering a complete solution for skiers who move across different terrains throughout the day.

The visual identity evolves this season with a refined, earth-inspired palette, from light, neutral tones to deeper mineral shades, reflecting a more grounded and understated expression of performance.

DROW

ACCESSORIZE YOUR ADVENTURE

The DROW is a one-piece multifunctional ski pole engineered for skiers who value precision and reliability. Its 7075 aluminum shaft balances low weight with long-lasting durability, while the extended EVA foam grip provides control and insulation during sidehills and transitions. Compatible with the Sling and Camera Clinch, it adds practical versatility while maintaining a clean, minimalist design.

THREADED CAP & SHEPHERD KNOB

Integrated threaded top cap allows quick interchange between accessories, adding versatility without compromising the pole's clean design. The shepherd-style knob shape provides a natural, secure hold for precise handling during transitions and movement.

SCULPTED MID-GRIP SUPPORT

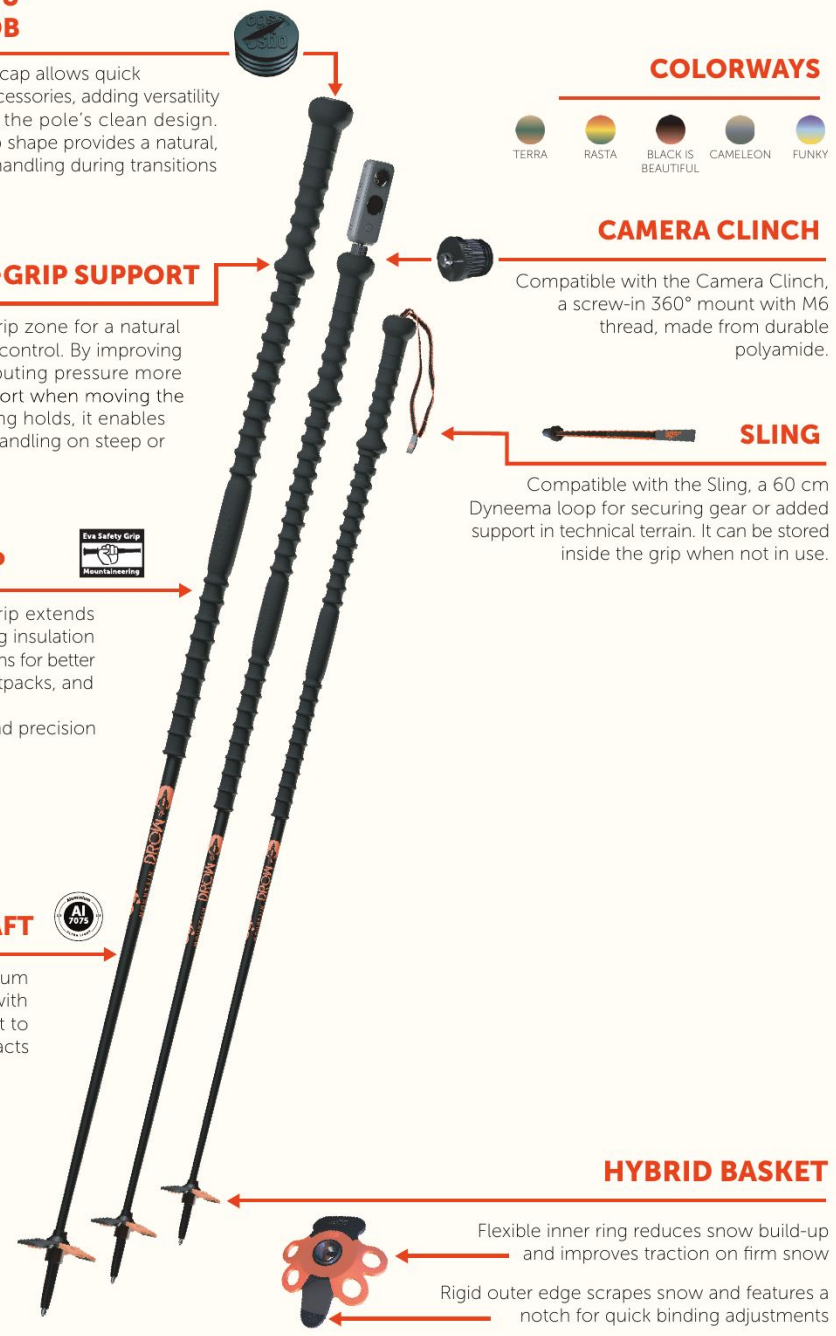

An integrated circular grip zone for a natural pinch point for fingertip control. By improving grip leverage and distributing pressure more efficiently, it reduces effort when moving the pole. Inspired by climbing holds, it enables precise and controlled handling on steep or technical terrain.

EXTENDED GRIP

Full-length EVA foam grip extends down the shaft, providing insulation and multiple hand positions for better control on sidehills, bootpacks, and technical terrain.
Designed for comfort and precision in changing conditions.

ONE-PIECE ALUMINUM SHAFT

Aerospace-grade aluminum provides high strength with controlled flexibility, built to withstand repeated impacts in demanding terrain.

COLORWAYS

TERRA · RASTA · BLACK IS BEAUTIFUL · CAMELEON · FUNKY

CAMERA CLINCH

Compatible with the Camera Clinch, a screw-in 360° mount with M6 thread, made from durable polyamide.

SLING

Compatible with the Sling, a 60 cm Dyneema loop for securing gear or added support in technical terrain. It can be stored inside the grip when not in use.

HYBRID BASKET

Flexible inner ring reduces snow build-up and improves traction on firm snow

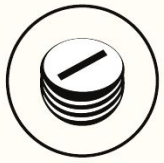

Rigid outer edge scrapes snow and features a notch for quick binding adjustments

CORK GRIP

CORK NATURAL GRIP

Natural cork grip molds to the hand over time, creating a personalized fit. It efficiently wicks moisture and remains comfortable in both hot and wet conditions, reducing fatigue on long days.

EVA LOWER GRIP

Extended EVA foam grip provides additional hand positions for quick repositioning on steep terrain. Improves control and efficiency without needing to adjust pole length.

7001 ALUMINUM SHAFT

7001 aluminum shaft delivers a balance of strength and weight. Designed to provide reliability in demanding and unpredictable terrain.

3-PIECE FOLDING CONSTRUCTION

Three-section folding design allows the pole to pack down compactly. Makes storage, transport, and attachment to a backpack easy and efficient.

COLORWAYS

Dark gunmetal/olive grey shaft with olive green accents .

WRIST SLING

Adjustable wrist strap provides added support and security. Reduces hand strain while maintaining control during technical sections.

FOLDING RETENTION STRAP

Integrated strap keeps all pole sections securely bundled when folded. Simplifies packing, storage, and transport on the go.

COUPLER CLIPS

C-clamp style clips secure both poles together for single-hand carrying. Improves convenience during scrambling, transitions, or rest stops.

LEVERLOCK

External lever lock enables fast, secure, and tool-free length adjustment. Easy to operate with one hand, even in changing conditions.

TREKKING BASKET

Trekking basket prevents the pole from sinking into soft ground such as mud or loose soil.

REMOVABLE SNOW BASKET

Adds extra support when trekking across snowy terrain.

HATCH

All-terrain Travel Duffel

The HATCH Duffel is engineered for professionals and athletes requiring a rugged, weather-resistant bag capable of handling daily use and extended alpine travel. Featuring a multi-carry system; backpack or duffel, it adapts to every transition. Constructed from high-grade tarpaulin with reinforced stitching, it offers abrasion resistance and water repellency for dependable performance in snow, rain, or rough terrain.

AXYVO™ ULTRALIGHT DAYPACK

The ACME is ultralight daypack, designed for hikers, climbers, and outdoor professionals who want to carry what they need without unnecessary weight. Constructed from 210D nylon reinforced with AXYVO™ UHMWPE fibre, it combines low weight with high tear strength and durability. Its ripstop construction and IPX6 waterproof protection help keep contents protected in changing mountain conditions. Built for day hikes, fast missions, and overnight objectives where keeping your load light matters.

TOP LOADING MAIN COMPARTMENT
Top-loading design provides easy access while maximizing usable pack volume.

VERTICAL GEAR RAIL WEBBING
Full-length webbing rails provide multiple attachment points for accessories, cords, or compression.

ICE AXE HOLDER
Front attachment system securely carries an ice axe, with both pick/blade ends accommodated for stable storage.

ELASTIC GEAR
Shock cords provide quick stowage for lightweight items such as jackets, gloves, or wet gear.

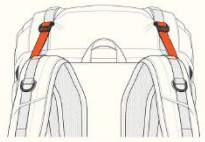

UTILITY POCKET
External pocket keeps frequently used gear accessible and organized.

BOTTOM LASH POINTS
Webbing anchor points allow additional gear to be securely attached externally.

BACK PANEL HARNESS
Full harness system for a secure, adjustable carry.

LOAD LIFTER STRAPS
Adjustable straps to stabilize and balance heavy loads.

STRENUM STRAPS
Adjustable straps for added stability and all-day comfort.

TRAIL SEAT BACK PANEL
Structured back panel doubles as an insulated seating surface for comfortable breaks on the trail.

APOGEE

AXYVO™ ULTRALIGHT MULTI-DAY-PACK

The APOGEE is ultralight multi-day pack, designed for climbers, campers, and outdoor professionals who need generous capacity without the weight of a conventional pack. Constructed from 210D nylon reinforced with AXYVO™ UHMWPE fiber, it combines high tear strength, durability, and IPX6 waterproof protection.

TOP LOADING MAIN COMPARTMENT

Large-capacity compartment maximizes usable space for efficient packing.

UTILITY POCKET

Buckle-secured front pocket keeps frequently used gear protected and within easy reach.

DUAL SIDE DAISY CHAINS

Full-length daisy chains provide versatile attachment points for technical gear and accessories.

BOTTOM LASH POINTS

Webbing straps at the base provide secure attachment points for carrying additional gear externally.

REMOVABLE LID

Detachable top lid simplifies the pack when less protection or weight is needed.

SIDE COMPRESSION STRAPS

Stabilize the load while allowing additional gear to be secured externally.

ICE AXE HOLDER

Front attachment system securely carries an ice axe, with both pick/blade ends accommodated for stable storage.

SIDE STRETCH POCKET

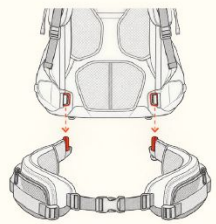

Accessible storage for water bottles, tent poles, and other long gear.

BACK PANEL HARNESS

Full harness system for a secure, adjustable carry.

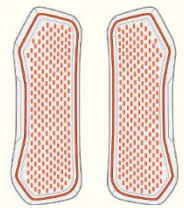

REMOVABLE HIP BELT

Distribute the load while allowing a lighter setup when needed.

STRENUM STRAPS

Adjustable straps for added stability and all-day comfort.

LUMBAR PAD

Central padded support with a ventilation channel.

ESKER

AXYVO™ ULTRALIGHT TECHNICAL PACK

The ESKER is ultralight technical pack, designed for ski mountaineering and technical mountain missions where low weight and freedom of movement are essential. Constructed from 210D nylon reinforced with AXYVO™ UHMWPE fiber, it combines exceptional tear strength with IPX6 waterproof protection and a narrow technical profile.

DRYSACK

MULTI-FUNCTION COMPRESSION

Made from durable tarpaulin with welded seams, the DRYSACK keeps your gear compressed and protected from water. Its airtight, watertight closure and multi-function valve let you release air to reduce bulk or add air for inflation and flotation.

SIZES & SPECS

	13L/3gal	20L/5gal	35L/9gal

MUTI-FUNCTION VALVE
For compression and air-release.

COMPRESSION SYSTEM
Reduces volume and keeps contents secure.

INFLATION SYSTEM
Creates extra volume and flotation.

AIRTIGHT & WATERTIGHT CLOSURE
Roll-top closure keeps water out and contents secure.

TARPAULIN
Durable, abraison-resistant, and wtaerproof.

VACSACK

WATERPROOF COMPRESSION

The VACSACK uses durable TPU with welded seams to create a highly water-resistant barrier around your gear. Its compression valve releases excess air to reduce bulk, while the airtight zipper closure keeps contents sealed and protected from wet conditions.

SIZES & SPECS

	5L/1gal	13L/3gal	20L/5gal

TPU
Flexible, durable, and high performance.

WELDED SEAMS
Heat welded for load-proof protection.

IPX 7
High water resistance to protect content in wet conditions

AIRTIGHT & WATERTIGHT CLOSURE
Roll-top closure keeps water out and contents secure.

COMPRESSION VALVE
Air release volve remove air for maximum savings.
